💬 Skype stefan_fuertinger

Gender Male | Date of birth March 22nd 1983

Nationality Austria

EMPLOYMENT

Since Jan 2018

Independent Scientific Consultant

Fuertinger Scientific Consulting, Frankfurt am Main (Germany)

Data-Mining and Pattern Recognition for Big Data Applications

I use experimental machine-learning techniques in combination with stochastic optimization schemes to identify patterns in natural language texts.

Software-Development and Optimization

I design and implement novel algorithmic strategies to optimize the run-time performance of computationally demanding numerical operations in high-performance computing environments.

Jan 2017 – Dec 2017

Research Scientist

Ernst Strüngmann Institute for Neuroscience in Cooperation with Max–Planck Society
Frankfurt am Main (Germany)

Mathematical Modeling of Complex Dynamical Systems

I designed and implemented a detailed computer model based on a system of non-linear stochastic differential equations for simulating brain activity during speech production.

High-Performance Computing

I worked on special implementations of novel graph partitioning strategies custom-tailored to high-performance clusters for the purpose of detecting modular patterns in unstructured large-scale networks.

May 2013 – Dec 2016

Postdoctoral Research Fellow

Icahn School of Medicine at Mount Sinai
New York, NY (USA)

Visualization of Complex Networks

I developed novel techniques to visualize high-density networks to illustrate complex relations in the topology of large-scale networks. Some of my visualizations have been published on the [Website](#) of the London Institute of Medical Sciences.

Initiation and Management of Inter-Disciplinary Research Projects

I have established cooperations with clinical practitioners, directed the coordinated integration of multimodal patient recordings across multiple different sources into a single data archiving architecture and acted as scientific mentor of numerous students across multiple research projects.

Apr 2013 – Nov 2014 **Scientific Consultant**

Renal Research Institute
New York, NY (USA)

- Design and implementation of a graphical multi-platform application for visualization of anonymized longitudinal patient data

Dec 2009 – Nov 2012 **Research Associate**

Special research center for Mathematical Optimization and Applications in Biomedical Sciences
Karl–Franzens University Graz (Austria)

- Inter-disciplinary research work in the area of mathematical imaging for real-world applications in nuclear medicine and radiology
- Design and implementation of an algorithmic strategy for segmentation and successive registration of dynamic contrast-enhanced magnetic resonance image recordings of the human abdominal region

Sep 2011 – May 2012 **Mathematics Lecturer**

FH Joanneum University of Applied Sciences
Kapfenberg (Austria)

- Lecturer for mathematics in the qualification course for university entrance

EDUCATION AND
TRAINING

2009–2012 **Ph.D. in Applied Mathematics**

Thesis Title: *An Approach to Computing Binary Edge Maps for the Purpose of Registering Intensity Modulated Images*

Institut für Mathematik und Scientific Computing
Karl–Franzens University Graz (Austria)

- Modern techniques for mathematical image processing
- Parallel programming
- Numerical methods for solving partial differential equations
- Applied functional analysis

2005–2009 **M.Sc. in Numerical Mathematics and Modeling**

Thesis Title: *Comparison of Cardiovascular Control Mechanisms under Orthostatic Stress*

Institut für Mathematik und Scientific Computing
Karl–Franzens University Graz (Austria)

- Numerical strategies for solving linear and non-linear equation systems
- Techniques for solving constrained and unconstrained optimization problems
- Analysis of dynamical systems
- Mathematical modeling of processes in biology and physics
- Theoretical principles of modern numerical analysis and linear algebra

2002–2005 **Pre-Diploma in Mathematics and Philosophy (Teacher Training)**

Karl–Franzens University Graz (Austria)

- Fundamentals of University-level mathematics
- Principles of educational theory and teaching
- Basic concepts of modern psychology and philosophy

PERSONAL SKILLS

Mother tongue German

Additional Languages English (Fluent)

Communication Skills

- Many years of experience working in multi-disciplinary research teams both in Europe and the US
- Successful track-record of working with international experts from various backgrounds in academia as well as the private sector
- Public speaking experience through numerous talks for scientific and general audiences as well as teaching experience with adults and teenagers

Organisational and Managerial Skills

- Several years of practical experience designing, managing and directing complex research projects
- Successful coordination of long-term projects with multiple inter-disciplinary collaboration partners
- Multiple years of experience training and mentoring undergraduate and high-school students
- Practical knowledge of writing and managing grant applications for research funding

Computational Working Environment

- Extensive knowledge and multiple years of practical experience working with the following programming languages:
 - **Python** including the packages *NumPy*, *SciPy*, *Matplotlib*, *Pandas*, *Cython*, *TensorFlow*, *scikit-learn* and *Plotly*
 - **MATLAB** including the *Optimization Toolbox*, *Statistics and Machine Learning Toolbox* and *Image Processing Toolbox*
 - **C** including the libraries *BLAS*, *LAPACK* and *SuiteSparse*
 - **R** including the packages *lme4*, *lsmmeans*, *coin* and *multcomp*
- Experienced using specialized data storage models for processing and archiving large complex datasets, such as *HDF5*
- Practical know-how of version control systems (mainly *Git*, previously *CVS* and *SVN*) for collaborative software development (public code library on [GitHub](#))
- Established team-wide coding and documentation standards and designed continuous integration pipelines (using, e.g., [Travis CI](#)) and testing suites (based on *pytest*) for automated quality control of large code repositories
- Routine use of kernel-level virtualization technologies (such as *Docker*) for sandboxing applications within containers to ensure software portability
- Multiple years of experience in system administration and maintenance of a variety of *Linux* distributions and *macOS* clients, professional user of *Windows*
- Well-versed using \LaTeX as well as all common Microsoft Office components
- Basic knowledge in *FORTRAN*, *C++*, *Mathematica* and *Perl*

ADDITIONAL INFORMATION

Awards and Recognition

- Supervisor of semifinalist Jacob Yatvitskiy in the nationwide *Regeneron Science Talent Search 2017*, he was named one of **300 Regeneron STS 2017 Scholars**
- Featured in the Wall Street Journal: *The Brain Wiring Behind a Frustrating Speech Disorder*
- Nominated by Icahn School of Medicine at Mount Sinai for the nationwide *Regeneron Prize for Creative Innovation 2016* with the research proposal: *Optimal Control of Epileptogenic Networks*
- Winner of the *2014 Travel Award of the Office of Postdoctoral Affairs* of the Icahn School of Medicine at Mount Sinai
- 3rd Place in the 6th *Annual Neuroscience Call for Images Competition* of the Icahn School of Medicine at Mount Sinai
- Supervisor of semifinalist Stephen Leong in the nationwide *Siemens Competition for Math:Science:Technology 2013* with the project *Correlation Networking of Speech Production: Examining the Brain with Comparative Graph Analysis*

Publications Peer-Reviewed

- S. Fuertinger**, J. C. Zinn, A. D. Sharan, F. Hamzei-Sichani, and K. Simonyan. Dopamine drives left-hemispheric lateralization of neural networks during human speech. *Journal of Comparative Neurology*, 526(5):920–931, Apr 2018.
